### The Vintage

"2013 was more of an average growing season here in northern California. The year went down as one of the driest years on record, but we got some nice winter rains in November and December of 2012. A warm January and February caused early budbreak. The mild temperatures brought us an early flowering in the first week of May. A cool summer slowed the season down. Berries and clusters were small giving us great flavors and intensity." – Anne Moller-Racke

Blue Farm believes that an intimate understanding and connection to our vineyards is core to making site-specific Chardonnay and Pinot Noirs of the highest quality.
